# 8.2 Что сделать на пробном туре

- Убедиться, что работаеют все IDE. Разобраться, как настраивать в них LOCAL.
- В системе ML это ML или RE?
- Максимальный размер файла
- Можно посмотреть на время работы серверов позапускав Флойда Варшалла

#### 8.3 Шаблон

```
#ifdef LOCAL
#define _GLIBCXX_DEBUG
#endif
#include<bits/stdc++.h>
using namespace std;
#define int long long
#define app push_back
#define all(x) x.begin(), x.end()
#ifdef LOCAL
#define debug(...) [](auto...a){ ((cout << a << ' '</pre>
    ), ...) << endl; }(#__VA_ARGS__, ":",
      _VA_ARGS__
#define debugv(v) do { cout << #v << ": "; for (</pre>
    auto x : v) cout << x << ' '; cout << endl; }</pre>
    while(0)
#else
#define debug(...)
#define debugv(v)
```

#endif

```
int32_t main() {
    cin.tie(0);ios_base::sync_with_stdio(0);
}
```
